PROFESSIONAL EXPERIENCE

BIOLOGICAL TECHNICIAN

Arkline Laboratories, New York, NY
October 2020 - Present

- Utilize a variety of molecular biology approaches to support research projects, including cloning, analysis, and preparation of DNA samples from specimens
- Coordinate with the laboratory team to conduct experiments and cell-based assays investigating the effects of new molecular treatments on cancer cells
- Gather and analyze experimental data, ensure compliance with safety protocols in a controlled testing environment, and manage storage of sample specimens

BIOLOGICAL TECHNICIAN

Gentech Labs, New York, NY
May 2019 - October 2020

- Collected biological samples to support an ecological study on habitat pollution, managed the safe storage and transport of samples, and analyzed findings in a testing environment
- Conducted biochemical and molecular analysis on plant and animal samples and performed data mapping to present results on the effects of hazardous materials on wildlife

EDUCATION

Bachelor of Science (B.S.) Biology
University of Syracuse, New York, NY
September 2015 - May 2019

KEY SKILLS

- ◆ Laboratory Testing
- ◆ Animal Studies
- ◆ Clinical Research
- ◆ Laboratory Safety Regulations
- ◆ Data Collection
