

Jacob Kent

Detail-oriented industrial maintenance technician who has exceeded the average productivity for all employees by 35% or more over several years and two jobs.

Committed to excellent health and fitness and often asked to give input on or revise processes to make them more efficient. An advocate for preventative maintenance and safety, I am also responsible for training seasonal maintenance employees.

Professional Experience

Industrial Maintenance Technician

Innovative Chemical Products, Seaford, WA January 2020 - Present

- Provided innovative idea regarding onsite safety which reduced annual incidents by 30%
- Keep up a high degree of physical fitness to ensure stamina to stand eight or more hours per day
- Demonstrated exceptional attention to detail by consistently following the technical specifications for installation and maintenance procedures perfectly
- Assisted in the revision of existing site processes and introduced a program focused on preventative maintenance

Industrial Maintenance Technician

Graham Packaging Company, Selah, WA September 2018-December 2019

- Exceeded preset productivity targets by 35%
- Participated in a pilot group that was later responsible for helping others as the company transitioned from paper requests and records to a CMMS
- Trained four seasonal workers in company processes and the specific jobs each was assigned
- Repaired defective conveyor systems, used hand tools to install belts in machinery, tighten bolts, and adjust tension rolls
